This guy appeared first in Mandalorian SE03EP01. I sculpted him on my iPad Air 4 (2020) using Nomadsculpt. First it was planned to be a bust, without hands. But in the end he got some personality with the hands and the pose.

Hope you like it. Best to print with resin but was tested on fdm too.

Do not support the necklace because you won't be able to separate it without breaking.

Use organic supports. And brim recommended too.
