Summary

Turin DF84 pointer grinder modification.

Tags: [grinder](#) [accessories](#) [pointer](#)

I used the Raven skull model to modify the Turin df83 grinder pointer.

The pointer allows a more accurate measurement of the grinding grade and adds a little detail to the design.

Nothing needs to be glued on; it just snaps into the existing hole.

In the picture, the model is painted with "Citadel Layer: Runefang Steel"
