Summary

This is a remix of the Maker Lamp for LED strips.

[Household](#) > [Living Room](#)

This is a remix of the Maker Lamp for LED strips.

I used 1 Meter 5v Neopixel WS2811 144 LEDs with a small Wifi controller and an external 5v power supply.
You can find the links below.

Changes to the original:

- Created a tube to tape the led strip on
- Changed the lamp body to hold the tube in place
- The tube holds the lamp shade to the lamp body

Print instructions:

- Print the body and the led tube
- Print an original shade from [here](#)
- Print the lid if you have chosen for a round shade
- 2 perimeters/walls
- 5 top/bottom layers
- 15% infill
- no supports
- no brim - except for the tube

Links to the electronics I used:

- [Neopixel WS2811 1m 144 IP30](#)
- [Controller SP108E](#)
- [Power Supply](#)
