This is a modified rear box for mounting hungarian mirror light Rabalux Silas. The original box has gromet for mains cable not in center of the box, which may be bad, if you have your mains cable centered above the mirror. For this case, here is my box. Just mounted two of these lights above our wide mirror and it is okay. Take silicone gromet from original box. And, original box have silicone sealing to the counterpart stainless steel box, which, of course, this box has not. This IP protection class is lower than original, maybe some steam from bathroom can enter inside (although I think not so much).

Supports: Yes

Resolution: 0.25

Filament: Devil Design PETG black
