Summary

Holder of 3mm under-hotbed-insulation.

[3D Printers](#) > [Accessories](#)

Tags: [hotbed](#) [insulation](#) [hotbedinsulation](#)

Holder of 3mm under-hotbed-insulation.

Resolution: 0.6mm (nozzle 0.8mm)

Infill: 0%, 1 perimeter

Filament: [Spectrum PET-G](#) Lion Orange

Notes:

Printed from PET-G, nozzle size 0.8mm, one perimeter and 0% infill, this produces fast print and is overall OK.

Insulation mat comes from here:

Buy the 220x220mm version (for Anycubic I3 Mega), cut corners and insert it under hotbed (no need to dismantle the bed). Then fix it with this printed spring, 4pcs needed.
