Summary

Decorative cat sculpture (imitating a scrap metal cat sculpture)

[Art & Design](#) > [Sculptures](#)

Tags: [cat](#) [sculpture](#) [3dsculpture](#)

Simple decorative cat sculpture. The different parts fit together loosely and need to be glued for permanent installation.

Printed with black AMAZ3D filament, 0.28 layer height, 10% gyroid infill. The nose and eyes are hollowed to save on filament. When printing, only the nose will need support (which is hidden inside the sphere).
