Tags: [box](#) [tickettoride](#) [goteborg](#) [gothenburg](#)

Introduction

The fan made Ticket to Ride expansion Göteborg, Knô daj in, has gone through several iterations and now consists of the board, all cards and even a box to store everything in. The box doesn't come with any kind of useful sorting insert though, so I decided to design my own.

I've also designed a set of game pieces that can be found here:
<https://www.printables.com/model/445786-ticket-to-ride-goteborg-game-pieces>

The inserts

The insert is split in parts, to make it printable on most printers regardless of bed size.

For v1 each part is designed to be printed twice. This will give 2 storage spaces for cards, 4 spaces for tram pieces and 2 spaces for station and point marker pieces.

For v2 each part is a quarter of the full insert and can be combined into two different setups.

Setup 1 has two single card slots and larger tram slots, while setup 2 has a card slot designed to fit the cardboard box for the train cards.

Other combinations are of course also possible, but the above mentioned setups are what I designed them for.

I've tried to make the design as light as possible, and printable without supports.

Print instructions

Designed to be printed in PLA with:

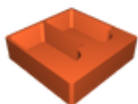

- 0.4 mm nozzle
- 0.3 mm layer height
- 2 perimeters
- 2 bottom layers (first layer 0.2 mm)
- 3 top layers
- No infill
- No supports.

Updates

2023-04-16

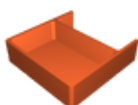

Added a new version of the inserts (v2).

Model files

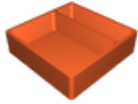

ticket_to Ride GBG box v2-2card_setup1.stl

☐ Two card slots.

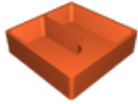

ticket_to Ride GBG box v2-box_large_half_setup1.stl

☐ Designed to be printed twice and put together to create three tram slots.

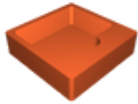

ticket_to_ride_gbg_box_v2-box_large_small_setup1.stl

☐ Used with the half-box part above to get a fourth tram slot and a small slot for other markers

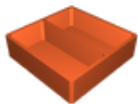

ticket_to_ride_gbg_box_v2-1card_setup2.stl

☐ A card slot (should also fit the card box) and a slot for stations and point markers.

ticket_to_ride_gbg_box_v2-2card_w_box_setup2.stl

☐ A card slot to fit the train cards within their own cardboard box.

ticket_to_ride_gbg_box_v2-box_equal_setup2.stl

☐ Two equal sized slots for trams. Print twice to go with the card slot box parts for setup 2.

ticket_to_ride_gbg_box_v1_insert1.stl

☐ V1. Print twice

ticket_to_ride_gbg_box_v1_insert2.stl

☐ V1. Print twice
