To be used with the Mechs miniatures provided on the Battletech Clan Invasion Kickstarter.

These are small plaques to drop on the underside of the miniatures with the name on it.

The base plaque file is also there. The fonts I used were Cooper for the Mech name and Stencil for the code variant.

Both supported and unsupported versions are present. I only printed this in resin, and I did not try to print them on FDM. If you do please drop here a line.

If you do not own a 3D Printer you may order it on <https://3dprintforgames.etsy.com/>
