I've discovered that I'm not the first, but perhaps my variations will be appreciated!

Who doesn't love Portal? And what better way to transport yourself to another place than through a good book?

I haven't printed it yet, but an inspection in PrusaSlicer leads me to think that supports would be a good idea for the "Portal Out" model. I think "Portal In" can do without supports, but that's really all about how your printer handles overhangs.

Print away, for Science! (You monster.)
