## Summary

Coffee cup + saucer with latte art used as decorative prop or flowerpot.

[Costumes & Accessories](#) > [Props](#)

A life size coffee cup + saucer.

Can be used a decorative props of as a flower pot.

You can print the white latte art into the brown coffee part when using a BL touch, making sure the BL touch touches the lower inside part of where the white latte art sits will make the printer think thats the bed and it will print the latte art inside the brown part. If done correctly.

Logo on side of cup is a custom change I made and is not incorporated into the downloadable files! The real cup is the one with the plant inside :) .
