updated 7. 4. 2023 | published 7. 4. 2023

Summary

A throwing object currently under development. USE WITH CAUTION!

[Gadgets](#) > [Portable Devices](#)

Tags: [boomerang](#) [frisbee](#) [hunting](#)

Object initially printed in PLA at 0.16 resolution. Performance is more like a Frisbee than a non-returning boomerang. Flies better and farther downwind. Boom_2 is the larger version - too large for a 235x235 or even a 250x250 bed. Use Boom_1 for those bed sizes.
