Summary

Is that LED on your Samson C01 mic too bright for you? Then this collar is what you need, from blinding to a dull glow!

I found that the LED on the Samson C01 Condenser microphone was too bright for my liking so I created this collar which loosely fits over the body of the mic to cover the light.

It dulls it out a lot without being too bulky. I printed this using Prusament PLA Galaxy Silver and the light is visible. I would say the brightness and visibility of the LED is dependent on the color and material used to print.
