Remixed the male-male articulating arm link from [Sneaks](#) to allow for a hanging positioned Raspberry pi cam v2 mount (see below).

The end game being to construct a small articulating arm with a simple pi cam mount (see pics).

You'll need other parts (links, bolts, nuts) from Sneaks articulating arm page above. The configuration in my pic worked well for me.

Checkout the other two reworks related to this one:

[Ender 3 v2 Neo - Mount point for Sneaks articulating arm](#)

[Pi Cam 2 - pivot joint hanging housing](#)

This remix is based on

Articulating Raspberry Pi Camera Mount for Prusa MK3 and MK2

by Sneaks
