A record weight made to stabilize the disk.

I made it to look like a revolver barrel because it is pretty cool.

This one was made to fit the Romanian 10 Bani coin, which is 20mm in diameter, hence the holes for the coins are 21mm in diameter (for tolerances purposes).

In each hole I could fit 22 coins (2 lei 20) and it holds up quite nicely and looks really cool when it spins.

Print Settings

Printer Brand:

Creality

Printer:

Ender 3 Pro

Rafts:

No

Supports:

No

Resolution:

0.2 - 0.24

Infill:

15%

Filament: Winkle PLA Grey

Notes:

The bulk of the weight is done with the coins, so the reduced infill is not an issue.

After printing it may or may not need a bit of sanding inside the holes in the case of layer start blobs, it holds the coins well either way.
