A simple print for something quite useful on almost the daily basis.

The token is made with the size of the Romanian 50 Bani coin.

The little handle is can be used to attach it to a key-chain, I made it so I don't lose it in my wallet.

It works with all the stores in Romania (I think other countries too as the size is similar to the 1 Euro coin). From some shopping carts you can even pull it out as some store carts don't lock it in.
