3D-printable **GEO 3550** stickers / magnets.

University of Michigan graduate student workers are striking for a living wage, necessary health benefits, and workplace safety.

For printing small lettering successfully, unless you enlarge the model, use a 0.15mm nozzle with a single perimeter to ensure readability. The included .3mf files can be imported into PrusaSlicer/SuperSlicer if you want to see where I'm putting color changes. If printing from the .3mf profile, please change the your machine and custom g-code settings to match your own printer. These work well with both magnetic and double-sided adhesive backings.

For best results, place stickers in visible places and donate to **GEO's strike fund.**
