Summary

Do you match my very specific need to have a removable, invisible attachment for your iPad to this specific bed?

Tags: [mount](#) [magnet](#) [ipad](#) [magnetic](#)

IMPORTANT: This will only work with iPad Pro 12.9in 3rd Generation!

Before this mount, the iPad would frequently drop between the mattress and the headboard of the **discontinued IKEA HOPEN**. It'd also sometimes dislodge the apple pencil. No more!

Using Apple's published **case accessory document**, I got the location of the magnets. This design uses clips to the bed frame, which are sufficient even in PLA with 2 walls. It allows for 3 large magnets to the steel frame, but I never installed them since the clips work great.

I found 4x4x1.3mm magnets and carefully placed them and put scotch tape over to hold them in place and protect the iPad surface.

Finally, there is a cable strain relief on the back to keep the USB type C cable ready to go.
