A newer better version is available: <https://www.printables.com/model/469632-chisel-holder-jorgensen>

I designed this as a wall mounting bracket to hold a set of 3 Jorgensen brand chisels. I have it set up on a French Cleat wall but it can be mounted directly to a wall or onto a tool cabinet or table. This is one of many shop tool holders I designed to help organize my garage and free up space!
