My mom is on the weight loss journey, so I made this little prize for her -30 Kg achievement. The letters on the flat surface are her logo.

If you'd like to insert your custom text, note that the visor is at a 45o angle in relation to it's base, as shown below:

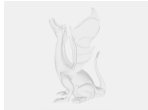

Hope this helps editing, since I don't know yet how to make it easily editable through code as I've seen around here. So, I made Fusion and STEP files available.

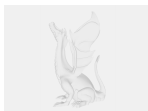

I used lightning infill at 20%, which provided quite a nice support for flat surfaces and text with much less material.
