Summary

Rock bottom some jabroni through the announcer's table!

[Toys & Games](#) > [Action Figures & Statues](#)

WWE announcer's table that breaks apart. I use 5mm x 3mm magnets to hold it together. The geometry of the table makes it extra tough so doing a power bomb directly on top of the table might not break it apart but jumping off the top rope and coming down at an angle would do the trick.

You can get the magnets from amazon.

I print at .6 layer height with a .8mm nozzle. Your results may vary with different settings and sizes.
