Summary

for all Flywoo pilots in need when upgrading to the O3 air unit

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [dji](#) [fpv](#) [djifpv](#) [flywoo](#) [flywooexplorer](#) [djio3airunit](#)

I designed a cam mount for the upgrade from the caddx nebula pro to the O3 air unit for the Flywoo Explorer Micro LR drone. Adjustable cam angle from 0 - 35° also added a reference indicator for a 25° cam angle.

Print Settings:

- Intended to be printed in TPU / flex material
- Designed to be printed without supports.

Fusion 360/ iges files added for easy modifications
