Tags: [xbox](#) [xboxcontroller](#) [sticksaver](#)

I have a Steamdeck and travel for work. I (re)created these stick savers to protect my XBOX controller while in my backpack. Based on a similar one I found for my Nintendo Pro controller, however designed from scratch.

I printed in PETG but should be good to print in PLA

Designed in onshape: <https://cad.onshape.com/documents/9a7f9ddhttps://cad.onshape.com/documents/9a7f9dd7e94dab386df6be6e/w/8f4a20b2d0207433256f2538/e/239409599e4a619f57575887?renderMode=0&uiState=643154189cd6311044eb4d9c7e94dab386df6be6e/w/8f4a20b2d0207433256f2538/e/239409599e4a619f57575887?renderMode=0&uiState=643154189cd6311044eb4d9c>

There is a variable in the onshape to adjust the thickness of the saver, which may allow for any variances in first layer thickness on a given printer.
