Tags: [wallmount](#) [parkside](#) [crowbar](#) [crowbarholder](#)

As the title suggests... these crowbars came in a paper box without a mount.

Printed with PLA. 20% infill is OK. I suggest using 100% infill around the screw holes just to give them some extra strength. This can be done in Cura with support blockers, but if you don't want to do that then 20% infill should be ok but be a bit careful how much you tighten the screws.

The model fits the bed of an Ender 3.

On the picture the individual slots are printed separately so it looks a bit messy, but the attached model combines all the four into one printable model, so it will look better.

Feel free to make it better: <https://www.tinkercad.com/things/fyd8sEvekpF>
