Summary

This mount allows you to mount a tire with 7mm hex diameter.

Tags: [landroverdefender](#) [trx4m](#) [traxxastrx4m](#)

This mount allows you to mount a wheel on top of the Traxxas trx4m Defender. It is designed to fit the original Canyon tires but most of the aftermarkets will also fit. You just need to screw it on the top and maybe file down the holding thing to fit perfectly. Print it sideways so you only have to support the hex.
