Summary

This candy bowl is great for Easter or to celebrate springtime.

Tags: [bowl](#) [easter](#) [candybowl](#) [candydish](#) [springtime](#)

This bowl is inspired by a design by [3dprintbunny](#) I saw on Thangs. I wanted a version that was a bit deeper and made the bunny cutouts deep enough to hold a lollipop or other objects with a stick or a stem (fresh flowers, anyone?)

There is a bunny-shaped cutout in the bottom of the bowl that is a separate body that can be used for a multi-colored print.

I modeled this in Fusion 360 - source included.

I printed this with 3 walls, 3 top/bottom layers, and 15% support cubic infill.
