This is a Dayne Johnson head shaped ocarina a.k.a. The Rockarina.

I made this model for the **3D Design Contests**. It was a fun project.

It made me very happy that when it was ready and I took it off the table, it made a sound, not the clearest sound, but a sound. Talented people might even be able to play on it.

The test printed with 0.2mm layerheight , 10% gyroid infill.  
For the test print, only the chin, ears and whistle were supported. For larger sizes, it is recommended to cut the model in 2 or more pieces and use more supports.
