Summary

This is a simple filament spool rack that uses square dowels because they're a bit more rigid than the round ones.

I needed a way to make my spools stop rolling away, so I made this simple spool rack. It uses square dowels because they're a bit more rigid than the round ones. You'll need 3/8" square dowels, which the big box home stores usually sell for ~\$2/ea. With 36" dowels it holds about 10 spools.
