Do you want your eggs to look cool? Give them sombreros!

Great accessory for (almost) any egg. If you don't have any real eggs, then you can print one. The sombrero also fits on [Easter Cats](#) (that's actually just a coincidence).

If for some reason you don't want to print the whole egg, you can print the cut version.

Disclaimer: You may need to let your slicer recalculate the dimensions of the object to millimeters
