### Lithophane of Gal Gadot's Wonder Woman

I printed my first Lithophane I found on Prinatbles, and was amazed how well it came out. Then I found out I could make my own from You Tube video, see below. It was a bit old but his instruction still worked.

My daughters are a fans of the Wonder Woman movies so I first found this image on line of Gal Gadot, it was a black and whit image so I thought it would work well. It's not my image so I'm adding the link to it.

Then I followed the instruction from the video, using the online <https://3dp.rocks/lithophane/> tool to create the STL file. Admittedly, it is hard to tell from the STL how well it would print, but I think the print came out great. And my daughter thought it was good too.
