Another cute articulate animal from my 15-year-old son.

This time a sea turtle.

Two files have been included.

- The .3mf file which contains the imported STL model from Blender.
- The .gcode model that was used to print the model in the photos.

The final model was printed in PETG for no reason other than the colour and using 0.15 mm layer height.

Remakes in PLA or other material would be very much appreciated.
