This is a stand for this rocket engine: <https://www.printables.com/model/425766-rocket-engine>

I used it to hold balloon rocket engines: <https://www.printables.com/model/164430-rocket-engine-balloon>

This is a really easy print to turn your rocket engine into a handy bowl for events. Attracts a lot of attention, and it's functional! Designed in Fusion 360, a very quick model that I printed about an hour before the event. It's a slightly loose fit, so easy to take the engine off for transport.
