Want to use your 2021 11" Ipad pro as the interface for your DJI mini RC-N1 controller instead of a phone? Don't want to remove the Ipad from the Logitech Touch Combo case ( https://www.amazon.co.uk/gp/product/B07W4DH1Y5 but are ok to remove the keyboard part)? Then this is the model for you, LOL!!

If your phone screen is proving to be a bit small for your eyes, transform your drone-flying experience with using your Ipad!!

This extends the sprung-mount built in to the DJI RC-N1 controller so that it will be big enough to hold the 11" Ipad Pro in it's case/mount. It will require a longer USB lead, I bought this one https://www.amazon.co.uk/gp/product/B08H1X8CJ1

Print it on it's side (as in the last picture) and with supports for the 2 slots. I printed it in PETG and at 0.24mm layer height, which has worked out grand.

EDIT(20/11/2023):

Added a ‘Mini’ version which is 40mm shorter to (hopefully) suit Ipad Mini's
