Summary

Replacement blades for a dji mini 2 drone

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [drone](#) [blades](#) [dji](#) [propellers](#) [djimini2](#) [djirc](#)

Best printed on an SLA printer, it will not work well on a FDM style printer.

found it best to support the model from the around the screw hole.

Curing:

start with 10 mins at 40 degrees celsius and adjust accordingly for you resin. the thin area on the blade can easily warp if over cured.

This model was printed on a Form 3B
