I've tried using normal plant labels, I find it tricky to write enough on. They're easily knocked out of position, etc.

I wanted to make some labels that could be easily looped on and off with string, that were durable, and reusable. I made this template so that I could cut the flat panels out of a milk bottle, draw around this and cut them out. I made the holes with a leather punch.

I got 11 tags out of a 4 pint milk bottle.

I hope this helps. Please leave a like if it does, and post any makes or remixes.
