### Update

I redesigned this model. You can find the new version here:

<https://www.printables.com/model/859158-clicking-ratchet-fidget-ring-20-print-in-place>

A simple fidget ring featuring a ratchet mechanism to make it click! Have fun!

This model was inspired by the [Print-in-place fidget ring](#) created by [@Makkuro](#) but is an original creation by me.

The ring initially may require some force to break loose (make sure you are twisting in the correct direction!) and depending on the printer and settings may require some lubrication like WD-40 or similar.

The inner diameter of the ring is 18 mm but it should not be too hard to adapt the supplied CAD files to other diameters.

The model in the picture was tested with Prusament PLA Galaxy Silver.
