Summary

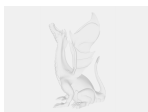

Small cloth scraps tray for Janome 990D overlock. Holds in place using magnet latching to door hinge.

Tags: [tray](#) [janome](#)

Prints without supports, magnet is inserted/glued after print. I used neodyme magnet size 10×10×5 mm, but you can use any reasonable sized magnet if you adjust mag variable in scad source. You can also adjust tray dimensions using tray_* variables.
