I made this a couple of years ago in the process of learning to use Fusion 360. Although the detail turned out to be a bit much for the flexible filament, it has performed admirably. I drop my phone, a lot, and somehow it's still alive.

I chose to print in a lurid shade of purple, because the filament was cheap. I know this is an old phone now, but maybe it'll be useful for someone. I have included versions with, or without the pattern.

I hope this helps. Please leave a like if it does, and post any makes or remixes.

All designs (however rubbish) are my own, and are made available for **non-commercial use**. Sale of design or prints is prohibited. You may find some of my other models interesting and/or useful too.
