Summary

THERE IS A NEW VERSION WITH BETTER FITTINGS AND DETAILS.

[Costumes & Accessories](#) > [Props](#)

Tags: [starwars](#) [star](#) [wars](#) [sith](#) [jedi](#) [custom](#) [lightsaber](#)

This is my first attempt at modelling a custom lightsaber, nothing extravagant but for a 1.0 version I think it is fine, supports are only needed on part1, if you choose the right orientation to print.

I will upload photos as soon as I have sanded, painted, and possibly electroplated it.

Soon I will also make another post with version 1.1, which shouldnt vary much from this one but have more details and better fittings.
