---

**This print requires a pause print** to achieve the hidden magnet effect. The print settings are explained in this video:

This magnetic fidget toy uses two **8x3mm neodymium magnets** found here: <https://www.amazon.com/FINDMAG-Magnetic-Whiteboard-Refrigerator-Magnets-8x3mm/dp/B0863BGG6H?th=1>

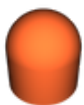

I recommend using a Sharpie to mark the outside of each magnet when they are connected like so:

When the print pauses, **insert one magnet into each half**. The marked side of each magnet must face up when inserting. This is important to **ensure the correct orientation of the magnets**.

Make sure to **print two halves** for a complete pill.

## Model files

**chill-pill.stl**

☐ Print two of these for a complete pill
