Summary

A stronger and hangable remix of Mistertech's wasp traps

[Household](#) > [Outdoor & Garden](#)

A simple remix of Mistertech's wasp traps. I added some gussets near the entrance holes to make the print a little stronger since it broke the first time it was knocked over.. I also added a 3mm hole with some support so you can thread a screw eye into the top to allow you to hang the bottle.

I have included version both with the holes and without. The long and short sizes are also included.

Printed with PETG for strength but according to the original's comments yellow PLA works well too.

Wasps are attracted to five main colours: Yellow being the most popular amongst all species of wasps

- **Pink**
- **Yellow**
- **White**
- **Green**
- **Purple**

Supports are not needed.

This remix is based on

Wasp Trap (12 oz - 2 Liter Soda Bottle)

by Mistertech
