Summary

Support for the 7Link baby monitor that clips on any Europlug USB power supply.

I wanted a way to fix the monitor somewhere out of reach, without having to make holes or anything complicated. This support solves the problem: it clips itself on any europlug you find with many USB power supplies. The support is designed for a flat Swiss power-plug, with a recess to allow space for an Edizio type light switch above it. You can fix the baby monitor with a standard camera screw.

I printed this part with a Flashforge explorer, in PLA, 0.4 mm nozzle with no support or raft.
