If you're like me and take a pile of pills and supplements daily, all the other wimpy pill containers out there simply weren't getting the job done. Behold, here is a pill container that will meet your needs, and hold it all.

The base contains 7 days of pills, both morning and evening. In order to get the pills out easily without everything falling out, print the slotted cover, and use the slot on whichever day you are trying to dispense. When not in use, it can rest between the base and lid. Finally, there is a plain base, or one with the days. Please note that I prefer my lid to be easy on and easy off. If you like less tolerance, scale down the lid slightly.

VERSION 2 UPDATE! The pill container base has been modified to have a rail system to allow the slotted pill cover to slide easily and remain against the pill slots, instead of having to be held in place when dispensing the

pills. Because of the new rail system, the cover has been narrowed to fit. Please use the "v2" files for the new base and cover. The two types of lids have been made slightly taller to accommodate the taller base (with the rails), but it will fit well on either versions 1 or 2.

Print Settings

Printer Brand:

Flsun

Printer:

Flsun V400

Rafts:

No

Supports:

No

Resolution:

0.2 mm

Infill:

30%

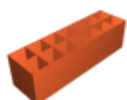

Filament: GST3d PLA or PLA+ Any

Notes:

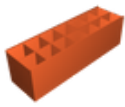

No supports needed. Any material will do, although non-toxic food-safe is recommended. Infill can vary, but higher infill will hold up better if you plan on traveling with it.
