Remixed from the original Gridfinity model, I wanted a flat base version for a friend that does not intend on using the Gridfinity system. Still stack-able with Gridfinity objects at the top if desired.

The STL file provided includes a color change towards the top rim to add a pop of color variance. If you decide you want it all in one color, either choose not to swap the color at that layer, or remove the color change pause at layer 175 and re-slice.

No supports needed. Enjoy!

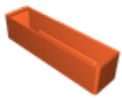

This remix is based on

Gridfinity Apple Watch Band compatible holder
