Summary

Mount under any horizontal surface. Remixed to use less filament.

[3dprinter](#)

Holds two spools, up to 75 mm thickness. Mount under your desk or shelf or any other horizontal surface.

I remixed the original to remove material from the edges since those areas have to bear less load/torque.

Settings

I printed it with 25% cubic infill and 4 walls/perimeters in PLA.

This remix is based on

Underside mount dual spool holder
