DOWNLOAD CAMLOCK and find more accessories [HERE](#).

This fitting tapers from 45 to 46mm so it should fit anywhere a standard vacuum cuff would, and connect to the CAMLOCK end. It may be a slightly loose fit depending on the length of taper of your part. I use a few wraps of PTFE plumbers tape to ensure a perfect fit, but a smear of bathroom silicone will make a permanent connection.

Prints without supports.

I have printed in PLA 0.2mm QUALITY settings. The print may seem a little tight when first inserted into the Camlock fitting, that is by design and it will ease after its been worked around a bit.
