Summary

Holds the top hat of the Voron V0.2 ajar to allow for heat to vent when printing with PLA

[3D Printers](#) > [Accessories](#)

Tags: **v02**

When printing with PLA, the V0.2 can get a little too hot and cause problems. This will keep the top hat slightly open to allow for enough heat to escape and keep the chamber cool enough while printing.

Print one or two, depending on how you feel. No supports are needed.
