## Summary

I have both the iFixit Manta & LTT Store driver, I wanted to keep them together in a way that stacked well with my tools

I have both the iFixit Manta & LTT Store driver, I wanted to keep them together in a way that stacked well with my tools.

I made this box to let me keep the original Manta case intact.

You will need 6 M3x30 screws.

As always, I've attached a STEP file for anyone that wants to make changes.

Updates:

- 2023 May 13: Added an STL with printing layout
