A replacement foot/bumper designed for the Zefal HP road bike pump. It has been tested on the HP version, but it looks like it will also fit the modern HPX model. Based on part model number HPX (#73xx) from the Zefal website.

This is a snug fit part, and will require some encouragement to slide into the pump bracket. Don't want to lose the pump from a bump.

Recommend printing flat, with brim, 100% infill, 0.8/0.10mm layer height. Use supports so the round base comes out as round as possible. Print on a slow, quality preset - this is a snug fit precision part. PLA seems to be ok strength wise.
