Wall Mount for Nest Wifi Router (2nd Gen)

This wall mount is meant to snugly fit/grip the 2nd generation (2019) Nest Wifi Router. This will not fit the Wifi point, it is designed for the router which is larger.

I was able to use this around my house to fit several routers for a stronger mesh network. The routers should fit snugly and no extra adhesion is needed if they are wall mounted. You will only need adhesion if they are mounted upside down on a ceiling perhaps.

I used #8 gauge screws which slightly thread into the PLA for a tight fit -- any gauge lesser should also work fine.

The screw hole locations were specifically chosen to fit existing screw holes in my wall lol. I plan to upload another version with other hole locations, but if I don't then feel free to comment and I'll get to it next time I check the comments.

Print Settings

Printer: Ender 5

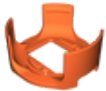

Supports: Yes

Resolution: 0.2mm

Infill: Not needed. Instead use extra perimeters

Filament: Hatchbox PLA White
