Summary

Mpcnc Primo Space Saver Table

[3D Printers](#) > [Test Models](#)

This table can be customized to 3-4 feet box but will advise to keep in the under 4 feet to factor in the weight. I was inspired by the attached video and I will make the dxf file available on thingsiverse and printable. The distance for your Cnc can be adjusted by moving the top anchor up or down. I will be updating the files as time goes by to make this better project. thanks
